I-care™

MANAGING INDUSTRIAL RISKS
by Predicting the Unpredictable

Company Overview

I-care is a global leader in predictive and prescriptive maintenance.

Our AI-powered and data-driven solutions predict industrial failures before anyone else. We help our customers reduce risks for safer, more productive, and more sustainable industries.

Founded in 2004 and headquartered in Belgium, I-care employs over 500 people and has a presence in 15 countries.

Key Solutions

✓ Accelerating Maintenance 4.0 Journeys

- Wireless sensors and Continuous Monitoring Hardware
- Customized Analytical Software
- Digital Transformation Strategy Development
- Project Management
- Business Case Development

✓ Predictive and Prescriptive Maintenance

- Integrated, full service Predictive Technology Applications (Vibration, IR, UE, Oil, Motion Magnification, Motor Testing)
- Reliability Centered Lubrication
- Accredited Training
- Reliability Staff Augmentation
- Talent Acquisition
- Calibration and Measurement
- Arc Flash Assessment and Electrical Safety
- Over 300 products (Vibration sensors, data collectors, cables, UE, IR Cameras, and more)

Key Figures

>80%
of failures that can be predicted

>67B
Monitored Replacement Asset Value (RAV)

>300,000
Machines monitored every day

25-30%
Reduction in maintenance cost
